

Senior Product Manager - Integrations

Moixa is a high growth venture and energy industry innovator which has established itself as the UK's leading residential smart battery storage company.

Moixa invents, manufactures and distributes smart energy technology including the Moixa Smart Battery range and Moixa GridShare - the battery asset management software platform that enables end customers to maximise the usage of renewable energy and unlock mass adoption of EV technology.

The Moixa team is growing fast and we are looking for a Senior Product Manager to work alongside our Product Team and the rest of our passionate team in London and Manchester.

The product manager role has responsibility for enabling Moixa's GridShare platform to deliver value through 3rd party hardware (ESS - Energy Storage Systems, EVSE - Electric Vehicle charge points) from global companies. This involves integrating with the GridShare platform or Moixa smart hub, enabling smart management functionality. You will be responsible for working to define how they are delivered to market. You will work with a range of teams within the company, and in particular with external stakeholders, to ensure successful product design and delivery. There will be a strong focus on employing service design principles to ensure that Moixa's expanding development team is targeting integrations that deliver most value

This is a unique opportunity for an experienced Product Manager who thrives in a scale-up environment, you enjoy defining and shaping product and business processes as well as having a strong focus on service design. You love tech and working on technical products and you are most comfortable when you are adapting and innovating.

Responsibilities:

- Ensuring GridShare integrated products and surrounding services meet internal, partner and customer expectations.
- Using company objectives to develop 3rd party integration strategy to enable clear activity planning.

- Engaging with 3rd party OEMs, service delivery partners and internal stakeholders to map business strategy.
- Ensuring the ongoing alignment of roadmaps with the rest of the Product Management team to coordinate the feature rollout plan.
- Work with senior technical staff on defining and managing quality processes.
- Providing product reports to clients and senior managers.
- Producing technically focused product information and reference guides for internal teams and external stakeholders.
- Supporting development team agile processes, such as delivery management.
- Prioritising product backlogs to plan and direct the work of delivery teams.
- Dependent on the stage in the product life cycle, responsibilities could include:
 - Product value evaluations (informed from research) and prototyping if required.
 - Managing the development and resolution of issues which occur in product production and implementation.
 - Developing product release plans, and ensuring that they are appropriately gated and signposted
 - Communication of priorities and status updates to stakeholders, particularly with customer facing teams.

Your key skills:

- **Strong technical literacy** – you can communicate effectively and credibly with technical colleagues
- **Making the complex simple** – you are great at taking abstract technical concepts and making them easily understood by non-technical stakeholders
- **You can see the big picture** – you are strategic and adept at prioritisation and planning
- **Exceptional stakeholder management** – you can influence and persuade, you know how to get business units to work together and overcome conflicting priorities
- **You are a curious and proactive problem-solver** – product management for you can include aspects of delivery when needs be, that's the nature of scale-ups and you handle it with confidence
- **You are adaptable** – growth means fast-pace and constant change, you handle uncertainty with a positive, solution-oriented attitude

Your ideal experience:

- You have worked in the energy sector, ideally in storage
- Electric vehicle supply equipment or Energy Storage System experience
- Knowledge of service design and delivery
- You have worked directly with technical teams
- Knowledge of software development practices
- Agile product management

Joining us gives you:
